First Name: Test Last Name: Employee	Verify adding a new employee.	The new employee should be added successfully and the employee details should be displayed.	The new employee was successfully added, and the employee details page was displayed.	Pass	High
TC-021	Verify that the user cannot add an employee with an empty First Name.	User is logged in and on the Add Employee page.	1. Leave the First Name field empty. 2. Enter a valid Last Name. 3. Click Save.	N/A	Verify First Name required field validation when adding an employee.	The system should not add the new employee and should display a required field validation message for the First Name field.	The system did not add the new employee and displayed a required field validation message for the First Name field.	Pass	High
TC-022	Verify that the user cannot add an employee with an empty Last Name.	User is logged in and on the Add Employee page.	1. Enter a valid First Name. 2. Leave the Last Name field empty. 3. Click Save.	N/A	Verify Last Name required field validation when adding an employee.	The system should not add the new employee and should display a required field validation message for the Last Name field.	The system did not add the new employee and displayed a required field validation message for the Last Name field.	Pass	Medium
TC-023	Verify that the user cannot add an employee with empty First Name and Last Name.	User is logged in and on the Add Employee page.	1. Leave First Name empty. 2. Leave Last Name empty. 3. Click Save.	N/A	Verify required field validation when First Name and Last Name are empty.	The system should not add the new employee and should display required field validation messages for both First Name and Last Name.	The system did not add the new employee and displayed both required field validation messages for both First Name and Last Name.	Pass	Medium
TC-024	Verify that the user cannot add an employee with an existing Employee ID.	User is logged in and on the Add Employee page.	1. Enter a valid First Name. 2. Enter a valid Last Name. 3. Enter an Employee ID that already exists. 4. Click Save.	Existing Employee ID	Verify duplicate Employee ID validation when adding an employee.	The system should not add the employee and should display a validation message that the Employee ID already exists.	The system did not add the employee and displayed the validation message "Employee ID already exists".	Pass	High
TC-025	Verify that the user can add an employee with an empty Employee ID.	User is logged in and on the Add Employee page.	1. Enter a valid First Name. 2. Enter a valid Last Name. 3. Leave Employee ID empty. 4. Click Save.	N/A	Verify adding an employee without an Employee ID.	The system should allow the employee to be added successfully when the Employee ID is left empty.	The employee was successfully added with an empty Employee ID.	Pass	Medium
TC-026	Verify that the user cannot add an employee when First Name, Middle Name, or Last Name exceeds 30 characters.	User is logged in and on the Add Employee page.	1. Enter more than 30 characters in First Name. 2. Enter more than 30 characters in Middle Name. 3. Enter more than 30 characters in Last Name. 4. Click Save.	More than 30 characters in each name field	Verify name field length validation when adding an employee.	The system allowed more than 30 characters in the First Name, Middle Name, or Last Name fields, but should have displayed a validation message and not allow the employee to be added.	The system allowed more than 30 characters in the First Name, Middle Name, or Last Name fields, but did not allow the employee to be added.	Pass	Medium
TC-027	Verify that the user cannot add an employee with an Employee ID of exactly 10 characters.	User is logged in and on the Add Employee page.	1. Enter a valid First Name. 2. Enter a valid Last Name. 3. Enter an Employee ID with exactly 10 characters. 4. Click Save.	Employee ID with more than 10 characters	Verify Employee ID length validation when adding an employee.	The system should not add the employee and should display a validation message that the Employee ID is too short.	The system did not add the employee and displayed a validation message "Employee ID must be at least 10 characters".	Pass	Medium
TC-028	Verify that the user can add an employee with an Employee ID of exactly 10 characters.	User is logged in and on the Add Employee page.	1. Enter a valid First Name. 2. Enter a valid Last Name. 3. Enter an Employee ID containing exactly 10 characters. 4. Click Save.	Employee ID: 1234567890	Verify adding an employee with the maximum allowed Employee ID length.	The system should allow the Employee ID and allow the employee to be added successfully.	The system allowed the 10-character Employee ID and the employee was added successfully.	Pass	Medium
TC-029	Verify that the user can cancel adding a new employee.	User is logged in and on the PMH Employee List page.	1. Click Add. 2. Enter employee information. 3. Click Cancel.	Valid employee information	Verify canceling the Add Employee operation.	The employee should not be added, and the user should be returned to the Employee List page.	The employee was not added, and the user was returned to the Employee List page.	Pass	Medium
TC-030	Verify that the user can edit an existing employee's information.	User is logged in and on the PMH Employee List page.	1. Select an existing employee. 2. Open the employee profile. 3. Edit the employee information. 4. Click Save.	N/A	Verify editing an existing employee's information.	The system should save the updated employee information successfully.	The employee information was successfully updated, and the updated Employee information was displayed after refresh.	Pass	High
TC-031	Verify that the user cannot update an employee with an existing Employee ID.	User is logged in and on the PMH Employee List page.	1. Select an existing employee. 2. Open the employee profile. 3. Change the Employee ID to an ID already assigned to another employee. 4. Click Save.	Existing Employee ID	Verify duplicate Employee ID validation when updating an employee.	The system should not save the updated Employee ID and should display a validation message "Employee ID already exists".	The system did not save the updated Employee ID and displayed the validation message "Employee ID already exists".	Pass	High
TC-032	Verify that the user can update an employee with an existing Employee Name.	User is logged in and on the PMH Employee List page.	1. Select an existing employee. 2. Open the employee profile. 3. Change the First Name and/or Last Name to match another existing employee. 4. Click Save.	Existing Employee Name	Verify updating an employee with an existing employee name.	The system should save the updated employee information successfully. Duplicate employee names are allowed.	The system successfully saved the updated employee information with an existing employee name.	Pass	Medium
TC-033	Verify that the user can delete an existing employee.	User is logged in and on the PMH Employee List page.	1. Click the Delete icon. 2. Verify the confirmation modal. 3. Click Yes, Delete.	Existing test employee	Verify deleting an existing employee.	The system should display a confirmation modal asking the user to confirm the deletion. After confirmation, the selected employee should be deleted successfully and a success message should be displayed.	The system displayed a confirmation modal asking the user to confirm the deletion. After clicking "Yes, Delete", the employee was deleted successfully, and a success message was displayed.	Pass	High
TC-034	Verify that a deleted employee cannot be found in the Employee List.	User is logged in and on the PMH Employee List page.	1. Select an existing test employee. 2. Click the Delete icon. 3. Confirm the deletion. 4. Search for the deleted employee.	Existing Employee Name and Employee ID	Verify that a deleted employee is no longer available in the Employee List.	The deleted employee should not appear in the search results.	The deleted employee was not displayed in the search results.	Pass	High
TC-035	Verify that unsaved employee changes are not applied when navigating back to the Employee List.	User is logged in and on the PMH Employee List page.	1. Select an existing employee. 2. Open the employee profile. 3. Change an employee field. 4. Click Employee List without clicking Save.	Valid updated employee information	Verify that unsaved employee changes are discarded when navigating back.	The system should not apply the changes because the user did not click Save.	The changes were not applied when the user returned to the Employee List without clicking Save.	Pass	Medium
TC-036	Verify that the user can update an employee's First Name.	User is logged in and on the PMH Employee List page.	1. Select an existing employee. 2. Open the employee profile. 3. Change the First Name. 4. Click Save.	Valid updated First Name	Verify updating an employee's First Name.	The system should save the updated First Name successfully and display the updated information.	The First Name was successfully updated, and the updated information was displayed.	Pass	High
TC-037	Verify that the user can update an employee's Last Name.	User is logged in and on the PMH Employee List page.	1. Select an existing employee. 2. Open the employee profile. 3. Change the Last Name. 4. Click Save.	Valid updated Last Name	Verify updating an employee's Last Name.	The system should save the updated Last Name successfully and display the updated information.	The Last Name was successfully updated, and the updated information was displayed.	Pass	High
TC-038	Verify that the user can update an employee's Middle Name.	User is logged in and on the PMH Employee List page.	1. Select an existing employee. 2. Open the employee profile. 3. Change the Middle Name. 4. Click Save.	Valid updated Middle Name	Verify updating an employee's Middle Name.	The system should save the updated Middle Name successfully and display the updated information.	The Middle Name was successfully updated, and the updated information was displayed.	Pass	Medium
TC-039	Verify that the updated employee can be found using the updated Employee Name.	User is logged in and on the PMH Employee List page.	1. Update an employee's First Name or Last Name. 2. Click Save. 3. Search using the updated Employee Name. 4. Verify the employee is found.	Updated Employee Name / Previous Employee Name	Verify searching for an employee using the updated name.	The system should return the employee when searching with the updated name, and should not return the employee when searching with the previous name.	The employee was found when searching with the updated name, but the employee was also returned when searching with the previous name after refreshing the Employee List.	Fail	High
TC-040	Verify that the updated Employee ID can be searched successfully.	User is logged in and on the PMH Employee List page.	1. Open an existing employee profile. 2. Change the Employee ID. 3. Click Save. 4. Refresh the Employee List. 5. Enter the updated Employee ID in the search field. 6. Click Search.	Updated Employee ID	Verify searching for an employee using the updated Employee ID.	The system should display the employee associated with the updated Employee ID.	The employee associated with the updated Employee ID was successfully displayed.	Pass	Medium
TC-041	Verify that the user can navigate between pages of the Employee List.	User is logged in and on the PMH Employee List page.	1. Review the Employee List. 2. Navigate to the previous/next page if available. 3. Navigate back to the previous page. 4. Log in to the application.	The Employee List contains multiple pages	Verify navigation between Employee List pages.	The system successfully navigated between the Employee List pages and displayed the appropriate employee records on each page.	The system successfully navigated between the Employee List pages and displayed the appropriate employee records on each page.	Pass	Medium
TC-042	Verify that the user is redirected to the Login page after the session expires.	User is logged in and on the PMH page.	1. Log in to the application. 2. Open the PMH page. 3. Leave the application inactive for a period of time. 4. Return to the application.	Valid login credentials. The system should redirect the user to the Login page when the session expires.	Verify session expiration and redirection to the Login page.	The user should be redirected to the Login page after the session expires.	The application opened on the PMH page, and the system redirected the user to the Login page when attempting to perform an action.	Fail	Medium
