

Bug ID	Title	Description	Steps to Reproduce	Expected Result	Actual Result	Recording	Severity	Priority	Status
BUG-001	"Invalid credentials" error message is not cleared when submitting an empty login field	When the user enters invalid login credentials, an "Invalid credentials" error message is displayed. If the user then clears the username and password fields and clicks the Login button, the previous "Invalid credentials" message remains displayed instead of being cleared and replaced with the required field validation messages.	1. Open the OrangeHRM login page 2. Enter an invalid username and password. 3. Click the Login Button. 4. Click Login again with empty username and password fields. 5. Observe the validation messages.	The "Invalid credentials" error message should be cleared, and only the required-field validation messages should be displayed.	The "Invalid credentials" error message remains displayed along with the required-field validation messages.	Invalid credentials	Medium	Medium	Open
BUG-002	The profile menu remains open after clicking the profile icon again	When the user clicks the profile icon, the profile menu opens. When the user clicks the profile icon again, the menu does not close as expected.	1. Log in to OrangeHRM 2. Click the profile icon to open the dropdown 3. Click the profile icon again	The profile dropdown should close when the profile icon is clicked again.	The profile dropdown remains open after clicking the profile icon again.	profile dropdown	Low	Medium	Open
BUG-003	Employee List and "No Records Found" message remain visible after opening an employee profile	When the user opens an employee profile from the Employee List, the employee profile is displayed successfully. However, the Employee List content and the "No Records Found" message remain visible at the bottom of the page, resulting in unrelated content being displayed together with the employee profile.	1. Log in to OrangeHRM 2. Go to PIM > Employee List 3. Click any employee name or ID	The selected employee profile should be displayed without Employee List content or a "No Records Found" message.	The employee profile opens successfully, but the Employee List and "No Records Found" message remain visible at the bottom of the page.	no records found	Low	Medium	Open
BUG-004	Add Employee page remains stuck in a loading state after navigating back from an employee profile	After adding a new employee and opening the employee profile, navigating back to the Add Employee page causes the page to remain in a continuous loading state. The page does not finish loading and is not available for user interaction.	1. Log in to OrangeHRM 2. Go to PIM 3. Add a new employee 4. Save the employee 5. Open the employee profile 6. Click Back to return to the Add Employee module	The Add Employee page should load normally and be ready for user interaction.	The Add Employee module remains stuck in a loading state and never finishes loading.	Loading add employee page	Medium	High	Open
BUG-005	The search dropdown remains visible in the top bar after scrolling	When the user opens a dropdown in any of the Employee List search fields and then scrolls down the page, the dropdown does not close or remain in its original position. Instead, it appears in the top bar and remains visible while scrolling.	1. Log in to OrangeHRM 2. Go to PIM > Employee List. 3. Click any search field that displays a dropdown list. 4. Scroll down the Employee List page. 5. Observe the dropdown position.	The dropdown should close when the user scrolls the page and should not remain visible in the top navigation bar.	The dropdown remains visible after scrolling and appears in the top navigation bar instead of staying positioned relative to its search field.	dropdown	Low	Low	Open
BUG-006	Employee profile has a noticeable delay when opened from the Employee List	When the user opens an employee profile from the Employee List by clicking the employee's name, Employee ID, or Edit icon, the profile takes an unusually long time to load before becoming available.	1. Log in to OrangeHRM 2. Go to PIM > Employee List. 3. Click an employee's Name, Employee ID, or the Edit icon in the employee list table.	The selected employee profile should load within a reasonable time after the user clicks the employee's name, ID, or Edit icon.	The employee profile eventually opens but it takes a long time to load before it becomes available.	employee profile	Medium	High	Open
